

After BDFS, you're done with **backend planning**.

The next document should be:

UXSD (UI/UX Specification Document)

ScrapFlow AI – Version 1.0

This document defines:

What screens exist

What components exist

What users see

Navigation flow

Mobile layouts

User interactions

Why UXSD Is Next

You now know:

Database 

APIs 

Business Logic 

Now you need:

Frontend Blueprint

before writing HTML/CSS/JS.

UXSD Structure

1. Design Principles

Mobile First

Because:

90%+ users will use phones

Simplicity First

Target users:

Scrap Collectors

Not accountants.

Large Touch Targets

Buttons should be easy to use.

2. Navigation Structure

Dashboard

Collections

Batches

Inventory

Buyers

Sales

Expenses

Reports

Settings

3. Dashboard Screen

Purpose

Business overview.

KPI Cards

Today's Sales

Today's Expenses

Today's Profit

Inventory Value

Inventory Weight

Active Batches

Charts

Profit Trend

Revenue Trend

Expense Trend

4. Collections Screen

Purpose

Create collection entries.

Components

Collection Date

Location

Collection Cost

Fuel Cost

Notes

Save Button

5. Batches Screen

Purpose

Manage batches.

Batch Card

Batch ID

Date

Status

Cost

View Button

6. Batch Details Screen

Information

Batch Information

Materials

Expenses

Sales

Actions

Add Material

Edit Batch

Close Batch

7. Inventory Screen

Inventory Table

Material

Weight

Estimated Value

Filters

Copper

Steel

Plastic

All

8. Buyers Screen

Buyer Card

Name

Phone

Total Purchases

Actions

View

Edit

Delete

9. Sales Screen

Create Sale Form

Buyer

Material

Quantity

Price/Kg

Total Amount

Sales Table

Date

Buyer

Material

Revenue

10. Expenses Screen

Expense Form

Type

Amount

Notes

Expense Table

Date

Type

Amount

11. Reports Screen

Reports

Profit Report

Inventory Report

Sales Report

Expense Report

Actions

[Download PDF](#)

[Download Excel](#)

12. Settings Screen

Profile

Name

Email

Password

Preferences

Theme

Language

13. Mobile Layout

Bottom Navigation

Dashboard

Inventory

Sales

Reports

More

Mobile Friendly Rules

Single Column Layout

Large Buttons

Large Inputs

Minimum Scrolling

14. Color System

Primary

Blue

Success

Green

Warning

Orange

Error

Red

15. Component Library

Reusable Components

Navbar

Sidebar

Cards

Tables

Forms

Buttons

Charts

Modals

16. Wireframes Required

Create wireframes for:

Login

Register

Dashboard

Collections

Batches

Inventory

Sales

What Comes After UXSD?

Now the planning phase is essentially complete.

Your document stack becomes:

01_Product_Blueprint 

02_DDD 

03_BASD 

04_BDFS 

05_UXSD ← NEXT

Then:

06_ERD Diagram

07_Wireframes

08_SQL Schema

09_FastAPI Setup

10_Backend Development

11_Frontend Development

12_Integration

13_Testing

14_Deployment
